Analyze a small dataset using python, documenting the step by step process of the data analysis journey

1. Import the library

```
##importing a pandas library
import pandas as pd
```

2. uploading the dataset

```
##Uploading a dataset
User = pd.read_excel("/Content/sample_ Dataset.csv"3mtt")
```

3. Display the sample of dataset

```
#printing the sample of dataset
Print_ (user)
```

```
Names of jss3 students    gender    age
```
